PUTNEY POINTS OUT THE WAY TO SUCCESS

Splendid Address Is Delivered to Student Body at First Assembly by Prominent Business Man; Speaker Congratulates University Because of Good Fortune in Having Dr. Boyd as President.

Mr. R. E. Putney, a prominent wholesale grocer of Albuquerque, delivered an extremely interesting and instructive address to the students of the University on "Business Efficiency," last Friday afternoon at the first assembly called this year.

Mr. Putney's speech was devoted entirely to business experience. Anyone following his advice is bound to be more successful in life. The principal point in his advice was to master one's thoughts and actions thoroughly and then proceed along scientific lines of right thinking and living. Mr. Putney advised also that each and every one of us should have a hobby, and suggested that in choosing one, people should have in mind the betterment of themselves morally, physically and intellectually.

The comparison of the development of the "human machine" to that of the automobile was extremely interesting. If a man would spend half as much time on the development of his own mind and body as he does on the automobile he buys, a higher degree of efficiency would be the result, Mr. Putney said.

"That indescribable, God-given something which makes the world go around is bound to be in evidence in order to maintain a high standard of efficiency," declared the speaker.

Mr. Putney concluded his address by complimenting the University and the state of New Mexico, on having such a man as Dr. D. R. Boyd at the head of the institution, and pointed out that the result of Dr. Boyd's efforts has placed the University of New Mexico in a position of great prominence.

The student body takes this opportunity of thanking Mr. Putney for the interest he has shown in the University and for the honor and experience it has gained from his address last Friday afternoon.

About three hundred people attended the first assembly. All present were very delightfully entertained with violin selections by Mr. LeRoy Yott; vocal solos by Mr. Padel and piano selections by Professor Stanley E. Seder. Reverend E. N. Bullock rendered the invocation and benediction.

"Why are you asking me for help? Haven't you any close relatives?"

"Yes; that's the reason why I'm appealing to you."

"Flubdub, married a society butterfly."

"I suppose he is wining and dining all the time now."

"Whining and dining. He doesn't like going out."

STUDENT MEETING AT ESTES IS A SUCCESS

University of New Mexico Had Two Representatives at Big Y. M. C. A. Gathering in Beautiful Colorado Park; Many Celebrities Speak at Conference.

On June 9, 1916, there assembled at Estes Park, Colorado, a great student gathering of Y. M. C. A. men. The eighth annual student conference held this year was the largest and in many ways the most successful yet held in the Rocky Mountain district.

Kansas, always in the lead in such matters, sent 126 men, Nebraska came second with 70, Colorado followed with 26, Oklahoma with 12, South Dakota with 3, and New Mexico with 2. The total student representation was 239. Counting in the leaders and speakers, the total attendance on the conference was 270.

During the ten days of the conference the delegates were privileged to hear some of the great leaders in Christian student work in America. One of the first speakers at the conference was Dr. Norman Richardson, of Boston university, who came to the students with facts and a clear, logical presentation of them which did not fail to make a deep and lasting impression upon those who heard him. "Dad" Elliott was there for the first few days of the conference. To speak of "Dad" is to speak of a man who understands college men and their problems, for "Dad" is in every sense a college man. He has the pep and the straightforward message which appeals to the red blooded man. To meet and talk with him is worth the cost and effort of the trip to the park. Many others were there with messages for the college man. Among these were Dr. John Timothy Stone of the first Presbyterian church, Chicago, Dr. Bailey of Denver, whose messages on the fatherhood of God will long be remembered by the men who attended. Dr. Paul Harrison, on a furlough home from Arabia, showed that though his business is to heal men's bodies, yet he was endowed with a gift of language and the personality of the orator. The last speaker at the conference was Arthur Rue of China. During those last few days when students were trying to solve some personal problems which weighed heavily on their heart and conscience he was the one to whom they turned for help and counsel. Some of the great leaders in student work date the beginning of their work to the day when walking over the hills with Rue they made the decision of their life's work.

To try and write of my experiences at Estes Park and tell what it meant to me is impossible, even though I had the space. This year the college Y. M. C. A. had one delegate. Next year it should have at least five. Estes Park is an ideal space to spend a vacation. There are few places in the Rockies to compare with it and none to surpass it. If this were

KOYOTE KLUB TO RAID DORMITORIES

Unique Organization Promises to Show Signs of Life Soon and Perpetrate Nocturnal Visits on Innocent Victims Selected for Induction Into Secrets.

The Koyotes have begun to yelp on the hill and there is feeling in the air that soon there will be a hot time in the old gym. But dorm dwellers who by your entrance into our midst signify your desire to join our midnight orgy do not be frightened and above all do not get the wrong idea of us. Remember that we once were in your place and that we have survived. That because we have been through we think the institution worthy of perpetuation. So in the midnight hours when there is a knock on your door and you are instructed to report immediately at the gym for initiation into our sacred bonds, greet the Koyote with a smile for he is your friend. Soon having the mark of our organization you will be singing Ki-Yi with us.

For the benefit of the freshmen we quote herewith from the Mirage on the duties of all Koyotes: "The new constitution provides that each Koyote shall keep all loose dirt scratched from his den and than any brother falling ill shall have his share of the day's kill, same to be carried to his den by a committee of three."

all that the conference afforded it would be worth going to for some, but the park affords much more than this. We all know that there are certain problems in the college man's life which must be settled at some time in his college career, problems whose right solving determine his success or failure in after life. Where better can these be solved than in the quietness and peace of beautiful Estes Park under the guidance of men who have made it the business of their lives to help men to invest their lives to the best advantage. Remember that now is the time to begin to plan for next year and in your plans put as a corner stone Estes Park.

The 1916 session of the Rocky Mountain Conference was memorable in that it marked the organization of the Estes Park Conference club whose purpose is to increase the conference attendance and to publish the Conference Record. It was also formed as means of helping the men to get better acquainted and as a means of holding together the men who have attended the conference. During this session of the conference a permanent organization was effected, officers were elected, and yells and songs were adopted. The constitution provides that there shall be two vice presidents from every state which sends ten or more delegates to the conference. Under this ruling New Mexico has one vice president. Next year we should have two. The present vice president from New Mexico is Thoralf Sundt.

FRESHMEN TO MEET AT NOON WEDNESDAY

Student Body Will Tell Under Classmen a Few Things They Should Know, in Order That They, in Turn, May Transmit the Knowledge to the New Men Next Year.

Because of the numerous matters which demanded attention during the first week of school, the upper class men permitted freshmen to wander over the campus practically at will last week. Now that things have summered down, however, the freshmen will be given proper instructions as to their behavior on any and all occasions.

The student body has called a meeting of all freshmen, to be held in Rodey Hall at noon Wednesday. All freshmen are expected to attend this meeting and learn words of wisdom from those who have forgotten their freshmen days.

It is probable that the same rules as were in effect last year will be introduced and placed in operation this year.

For the information of the freshmen the following rules in effect last year are submitted:

Requirements for Boys.

1. To wear green caps with yellow buttons.
2. To salute all members of the faculty and upper classmen.
3. To give up seats to faculty and upper classmen in crowded assemblies.
4. Can hold only class offices.
5. To bring up rear of parades, unless otherwise individually ordered.
6. To learn school yells and songs.
7. The caps to be worn from sunrise to sunset six days each week.

Requirements for Girls.

1. To wear badge of yellow button with green ribbon.
2. This also to be worn from sunrise to sunset six days a week.

"DATE," CALENDAR TO PREVENT CONFLICTS

The newly appointed Committee on Non-Athletic Student Activities is proving that the old saying "A new broom sweeps clean" is just as good today as it ever was and from this time on a date at the University of New Mexico is a date.

In the past it has not been infrequent for several functions to be scheduled for the same day or evening for the reason that no central clearing house has kept these student activities from tripping on each other's toes. Today things are different.

If any student organization wishes to hold any party or other function it must apply to the Committee in charge of such assignments. If the coast is clear a date is granted and when the Committee gives out a date it then becomes nailed to the mast, and except in extraordinary cases when once a date is granted its grantee may feel assured that he has a monopoly (ask Prof. Bonnet*) upon time assigned.

THE GLAD HAND BUSINESS.

Students at the University of New Mexico now have an excellent opportunity to put into practice an unwritten law which is rock ribbed in a few of the older universities of the East and South and which has met with wonderful success for years without number. The law of the campus in effect in these institutions is this: Speak to a fellow student whether you know him or not; whether you have been introduced to him or not. The rule should be applied especially with reference to new students. A polite salutation upon meeting of students, or of faculty members, for that matter, costs nothing, and will bring surprising results. In an institution of the present size of the University of New Mexico, it will be but a comparatively short time before every student knows every other student, either by sight or personally. The professor who knows only the men in his own classes and who does not attempt to cultivate those on the outside, will sooner or later find himself a bit unpopular.

STUDENTS EARN EXPENSES.

The statisticians have not yet compiled the data on varieties of employment engaged in by student of the University of New Mexico, or the proportion of students engaging in them, but when they do, it is safe to say they will reach a surprise. Probably no college institution in the country had a larger proportion of its undergraduate body engaged in gainful occupations in the past summer than the local one. Nor can it be doubted that any which shows a wider range of occupations listed will meet with difficulty in so doing.

Students from the university this summer have operated everything from an Indian trading post to a grocery store, and from a draftsman's desk in the forest service to a private secretaryship. Several engaged in newspaper work. One directed the destinies of his father's real estate office while "the governor" was on a vacation. Another made considerably more than the year's expenses as a life insurance salesman.

Several of the men put to practical use the engineering training received at the University. At least one was employed at the Chino Copper company's mines at Santa Rita, so he claimed. One drove an automobile mail stage. Two others aided members of the faculty in completing the survey of the University's land endowment, which it is expected this winter will show, when the notes are compiled, that the institution has about \$10,000,000 worth of real estate scattered over New Mexico.

Two were fire guards on the national forests. One spent the summer

as a bank clerk. Another was a mining chemist and made, perhaps, more money each month than most graduates do for several years after commencement.

The number of those who did farm or ranch work on the paternal estate was practically legion. One or two were secretaries to business or professional men. One of the girls provided for next winter's school expenses by acting as nurse for a neighbor's children. Another cooked for a family of friends.

Preliminary looks at the employment sheets in the president's office indicate that the work to be done this winter by men and women earning their way through the institution are equally varied. For instance, here are a few of the occupations that will be undertaken by students this winter:

Fireman, janitor, waiter (at University and in downtown restaurants), stenographer, draftsman, copyist on map work, newspaper work, paper carrier and dozens of others.

From this hasty glance at the work done and to be done by students it becomes increasingly evident that if anyone wants a man for almost any sort of work, or a girl for a range hardly less varied, notice need only be sent to the president's assistant and the man or woman forthwith will be forthcoming.

GET BEHIND THE TEAM.

The call has been sounded for football men for the 1916 eleven. If you are a football player—or think you are—get out and get into the game. You may not make the eleven this year, but you will be in line for honors next year, or even the year after.

Those who cannot play football can help the team by a display of co-operation and spirit. Get in behind the team from the very start and indicate your interest from the beginning.

A team may have all the "pep" in the world, but if it does not have the backing of the student body—enthusiastic support of the right kind—the best work on the gridiron is impossible of attainment.

The indications are that the A. & M. game in Albuquerque on Thanksgiving day will be the biggest local contest. Begin right now to prepare to win that game.

And while we are speaking of football, might it not be a good suggestion that some genius come forward with a new yell or two. The U. N. M. yells are worn threadbare with long use. Yell styles change just like the fashions in millinery. The man who can compose a new yell with the proper "punch" in it will confer a lasting favor on the cheer leaders and cheer brigades.

"Our graduating class comprised thirty-five young ladies."

"How many of them have planned careers?"

"None that I know of. Most of them are waiting for some movie company to snap them up."

Stumped.

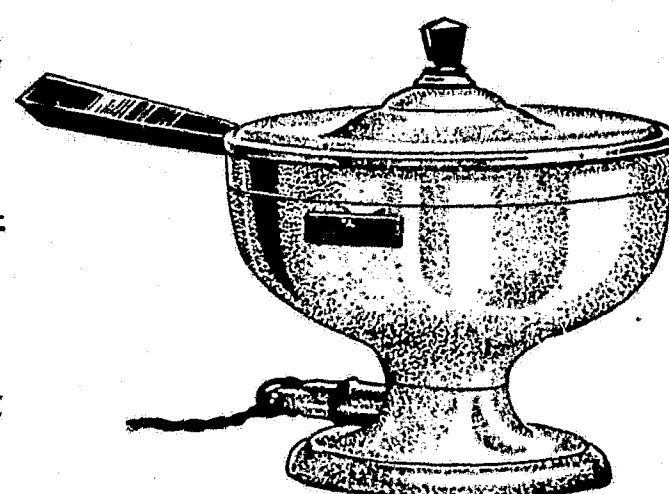

"Confound it! We're out of gasoline!" exclaimed the man at the wheel, as the car came to a stop.

"Can't you borrow some from some of these other drivers who are passing by?" asked his wife.

"That's more easily said than done. What security could I offer them?"

WHEN YOU ENTERTAIN----

GRIDIRON CANDIDATES URGED TO TURN OUT

Every Man Who Has Even the Faintest Idea He Can Play Football Asked to Volunteer His Services to Coach Hutchinson: "Beat A. & M." the Slogan.

Coach Hutchinson has announced that all men interested in football should report for duty Monday afternoon, August 28. The prospects for the University this year along athletic lines are greater than ever before. All those who are not quite decided about going out to make the team are urged to screw up their courage and see "Hutch" immediately about getting a suit. All who attended the Y. M. stag party last Saturday night realize how much it means to the University to defeat the Agricultural College here on Thanksgiving. We have a great many more men on the hill this year than we had last and competition is going to be much stronger, so let each man make up his own mind that he is going to make the team no matter what happens and the championship will be ours. It must also be remembered that we will not be able to put out a strong team unless we have a "scrub" team which will make the regulars work. It is a little early yet to be talking about picking the team, but in order to make a place on the team each man must get down to work immediately and show "Hutch" that he really means business. No one is any more pleased than the coach when he sees that a man takes an interest in the work and is trying to learn some of the fine points of the game. Captain Brorin understands the game thoroughly and with the co-operation of all the men and with "Hutch" as a guide we should have a real team.

INITIAL UNIT OF NEW SERIES BEGUN

Splendid New Chemistry Structure Now in Course of Erection to Be First of Series of Group of Buildings on University Grounds; Open Air Laboratory Work Feature.

During the past year the University authorities have had Walter Bury Griffin, an architect of international reputation, and who is at present establishing a federal center in Australia, construct a set of ground and building plans for the future of the University of this state.

The Chemistry Building now under construction, which is to be completed at the end of the first semester, is the first unit of the new University series. The Chemistry Building is to be strictly modern for all practical uses to which such a building is put, though conforming in architectural lines to the modified Pueblo style.

The building is to be constructed of reinforced concrete and hollow tile, and is to be absolutely fireproof. Within the building there is to be a patio or courtyard in which cement topped benches with gas and water are available for student use. This allows the student to do most of the ill-smelling work of the Laboratory out in the open air. Over one-half of the days of the College year at the University of New Mexico permits such outdoor laboratory work, and this arrangement is taking distinct advantage of our excellent climate. The building is a one-story building and will contain besides the usual

Y. M. STAG PROVES INTERESTING EVENT

Athletic Exhibitions and Short Talks by Well Known Association Workers Feature of Evening; Another Program to Be Put on in the Near Future.

The first Y. M. C. A. stag of the year was held at the gymnasium last Saturday night, and more than the usual enthusiasm and good fellowship resulted. This was undoubtedly the most interesting party the Y. M. has planned for a long time.

The first part of the evening was given over to various games and amusements. The fellows who were here last year, although in the minority, were not long in introducing some of the means of having a hot time—means that the new-comers were soon adopting with much enthusiasm, and in some cases with some recklessness. Boxing by Brorin and Williams, McMains and Bowers, and wrestling by McMains and Sinesio, afforded much amusement for the crowd, although for the participants the sport at times reached a point somewhat in excess of the strenuous life.

Exhibitions of tumbling were given, and the new men had a chance to see what is coming to them in the gym work.

Coach Hutchinson made a rousing speech on the prospects for a winning football team. He remarked that there is a tradition in this school that must be upheld; namely, that no man who has ever made the regular team has had a streak of yellow in him.

Brorin and Lapraik spoke enthusiastically about the football records and the future of U. N. M. athletically.

Mr. Steepleton entertained the crowd by telling of some "nuts" he has known, and Mr. Gale Seaman gave one of his fine addresses, urging the fellows to remember that to amount to anything they must develop every part of their nature, and must first learn to govern themselves. The speakers both emphasized the necessity of the development of the physical as well as the religious natures.

The band gave a few selections; Fullerton, as president of the Koyote club, addressed the raw recruits, and the Koyotes sang their war song. The eats were last—and least, five minutes later.

Fellows, you declared the stag was a success. Remember that we are planning for another in a few weeks; also remember that it will be snappier, if possible, than this one was. And remember that the Y. M. C. A. stands for the full development of every faculty; that the spiritual is as essential as the physical or mental; and that the Y. M. meetings, the Bible class, the vesper services each Sunday at four p. m. are conducted by the Y. M., or the Y. M. and the Y. W. jointly.

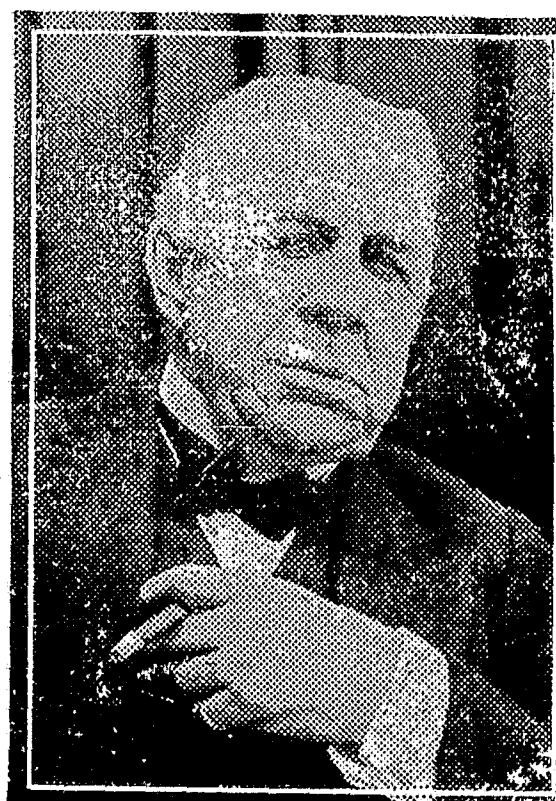

offices and stock rooms a large lecture room, Freshman laboratory, a Qualitative laboratory, Quantitative laboratory, and a private laboratory for research and special work which is carried on by the more advanced students.

While the policies of the Board of Regents are not definitely known, it appears probable that the second unit of the University will be started before the close of the present College year.

SOCIETY

New Students' Reception. (From the Freshman Standpoint.)

I was an honored guest at the classiest reception I ever went to Friday night. These Varsity people think I am some kid. Why, almost fifty people invited me to the party. Told me to be sure to come. Of course, I went. The dance was given at Rodey hall and everything was fixed up mighty nice with pillows and rugs and couches.

First thing they did was to tag me with my name. That was so I wouldn't need an introduction to the girls. There was surely one big crowd but I managed to get around and meet most of the people. Everyone tried to introduce me at once, and I could see that the girls were all crazy to meet me.

Well, then, we all sat down and Dr. Boyd, the president, gave us a little talk. Made me feel right at home. After that came the dance. Stags were as thick as molasses so I decided to be bold and distinguish myself from the crowd. Consequently I danced most of the dances, and incidentally got a crush on most of the girls. They liked me fine, too. U. N. M. knows how to treat freshmen all right.

There was a big bowl of punch on the table and we could help ourselves whenever we liked. That made it fine. I could have danced all night but they played the last dance at eleven thirty, so I told them I had had the time of my life and bid them good night.

Alpha Gamma Slumber Party.

The Alpha Gammas and their friends enjoyed the jolliest kind of a slumberless party, Thursday night at the home of Miss Louise Bell. The party first went to the movies and Grimshaw's, then to Miss Bell's home. A midnight luncheon was served Japanese fashion and the hilarity was not subdued until three o'clock in the morning. After a delicious but early breakfast the girls made their eight o'clock classes.

Those present were: Irene Boldt, Kathleen Long, Myrl Hope, Louise Bell, Rebecca Horner, Margaret Flournoy, Evelyn Trotter, Evalyne Long, Katherine Keleher, Mary O'Loughlin, Karen Little, and Lois Davis.

Phi Mu Slumber Party.

The Phi Mu girls entertained the pledges and friends Saturday night. After a visit to the movies the party spent the night at the home of Miss Betty Simms. Those present were: Mrs. Ed Ross, Miss Florence Seder, Miss Mary Bright, Mrs. Frank Pooler, Ethel Kieke, Betty Simms, Betty Arnot, Lina Fergusson, Adelaide Shields, Annie Cristy, Bernice Hamilton, Mildred Cady, Helen Aldridge, Katherine Keleher and Mary O'Loughlin.

President's Reception.

Dr. and Mrs. Boyd will have a reception for the students of the University, both new and old, at their home, corner High street and Gold avenue, Friday evening, September 1st, from eight until ten. All stu-

dents are cordially invited and requested to be present.

Alpha Gamma Luncheon.
The Alpha Gamma's were hostesses at a luncheon at the home of Miss Kathleen Long on Saturday. After luncheon the party attended a movie show. The Alpha Gammas also held "open house" to all students of the University Tuesday, August 22nd.

The Phi Mu sorority held "open house" to all students Tuesday, August 22, in their rooms at Kokona. Delightful refreshments were served.

LOCALS

Professor Dean A. Worcester this summer held a very important position as assistant psychologist at the Psychopathic Institute of the Juvenile Court of Chicago. There are two men elected each year to act as assistants and from the numerous applications which were entered Professor's was accepted.

Professor Roscoe R. Hill occupied a position this summer as head of the department of history at Berkeley, California, during the summer session.

The Sigma Chis made quite a celebration of the first meal in the newly remodeled house. A splendid dinner was prepared by their new cook and enjoyed by all alumni, active members and pledges.

Professor C. T. Kirk spent most of the summer in the oil and gas regions of Kansas and Oklahoma, and the mines of Arizona doing geological work. Professor Kirk has recently returned from a trip in the southern part of New Mexico.

Jack Lapraik, acting superintendent of the Chino Copper Co., has been seen on the campus and is contemplating locating here.

Hiram Herkenhoff, Hugh Cooper, Chester Boldt, Lyman Putney, Walter Parkhurst, and Harry Lee, are pledges to Pi Kappa Alpha.

Miss Lillian Spickard of Nashville, Tenn., will return September 5th and resume her work at the University.

Annie Cristy, Bernice Hamilton, and Adelaide Shields are pledges of the Phi Mu fraternity.

Miss Margaret Cook returned from California and has been enrolled as a junior.

Newell Manville, James Costin, and Herbert Hickey have been pledged Sigma Chi.

Wife: Mercy! What's the matter with your face? You look as though you'd been in a battle.

Hub: I was getting shaved by a lady barber, when a mouse ran across the floor.

"Now look out and keep the grand staircase cleared. Some of these lady guests have very long trains."

"That will be quite all right. I've hired an expert train dispatcher."
