DR. D. R. BOYD RESIGNS AS PRESIDENT OF THE UNIVERSITY

Resignation of President of University Closely Followed by Those of Mr. Brooks, President of the Board of Regents, and John R. McFie, Jr, Member of the Board.

Dr. David Ross Boyd, for the past seven years president of the University of New Mexico, tendered his resignation to the board of regents Thursday, to take effect on July 1st. In his letter asking to be relieved, Dr. Boyd expressed his disappointment at the inadequate appropriation provided for the university for the coming two fiscal years, which he states will make it difficult for the institution to meet the demands upon it. He states further that his personal business affairs will require his entire attention during the coming summer. His letter to the board, made public jointly by President G. L. Brooks of the regents, and by Dr. Boyd, is as follows: Albuquerque, N. M., May 22, 1919. To the President and Members, Board of Regents, University of New Mexico, Albuquerque, N. M.

Gentlemen:—I hereby tender my resignation as president of the University of New Mexico, to take effect on July 1, 1919, which is the end of my fiscal year.

The appropriation provided for maintenance and operation of the university, and for its enlargement and improvement is so wholly inadequate as to make it, in my opinion, impossible to meet the public expectations, or the public's reasonable demands upon the institution. For that reason I doubt my ability to produce for you the results we all desire.

It will be necessary, also, that I be free during the coming summer to give attention to my personal business affairs and to that end I request that you arrange to relieve me at the conclusion of my present year; that is, not later than July 1st.

I regret very much to sever my connection with the university because of the loyal support that has been accorded me by your board and the cordial and pleasant relations that have existed between us during all of the seven years of my service with you. Assuring you again of my appreciation of your many courtesies and your vigorous and loyal co-operation and support of my administration of university affairs, and of my high regard for each of you.

Yours very truly,
DAVID R. BOYD.

Dr Boyd came to Albuquerque as president of the university July 1, 1912, and will have rounded out seven years of service when his resignation takes effect. At that time the university had a campus of thirty acres. There were seventy-one students enrolled. At present the land owned by the university

consists of 360 acres and about 160 students are enrolled. The high water mark in attendance was reached in 1917, when there were 260 students at the university. Then the war came on and reduced the attendance, as it did at most every college and university in the country.

Prior to coming here, Dr. Boyd, from 1908 to 1912, was in charge of educational work for the Presbyterian board of home missions of home missions, with headquarters in New York City. In connection with his duties he travelled extensively, his work taking him into all sections of the United States, including Alaska and Porto Rico.

Dr. Boyd organized the University of Oklahoma at Norman, in 1892, was its first president and held the office for sixteen years.

Dr. Boyd expects to take a long and much needed rest and hopes to continue to make his home in Albuquerque.

No steps have been taken by the regents to fill the vacancy as his action came as a complete surprise to them. They knew nothing of his intentions until his letter was received.

Closely following the announcement of Dr. Boyd's resignation, came the news Friday that Mr. George L. Brooks, for the past six years president of the board of regents of the university had forwarded his resignation to the governor, to take effect at once. Mr. Brooks would make public no reasons for his action.

Attorney John R. McFie, Jr., of Gallup, a member of the board of regents, also has tendered his resignation to the governor. Mr. McFie has been serving in the army in France for the past year. He has now determined, it is announced, to enter the practice of law in Manila, P. I., and to go to the islands in the immediate future. Governor Larrazolo, therefore, will be called upon to fill two vacancies in the board of regents, both the retiring members being republicans. The members of the board, each having two years still to serve, are Dr. J. A. Reidy of Albuquerque, secretary and treasurer of the board, Hon. Nathan Jaffa of Roswell, and Hon. Antonio Lucero of Las Vegas.

Durin his long period as president of the board of regents, Mr. Brooks has performed notable service for the state university. He has given the business management of the institution a large share of his time, serving, as do all members of the regents, without remuneration, and

(Continued on page 4.)

AMENDMENTS TO NEW CONSTITUTION DRAWN

Student Council In Monthly Meeting Approves of Four Suggested Amendments. Election June 5th.

A notice of an election to be held June 5, to vote upon four proposed amendments to the constitution of the student body, has been posted upon the students bulletin board. The proposed amendments appear full upon the face of the notice.

These amendments were taken up, discussed, and approved by the student council at its regular meeting held Wednesday night.

At this meeting the new officers, Don Richardson, president; Frances Bear, vice-president; and George Leaty, secretary, were installed as provided for in the constitution.

The notice is as follows:

NOTICE.

The student body will meet in Rodey hall, Thursday, June 5th, to consider the following proposed amendments to the student body constitution:

1. Article I, section 7, to be amended to read as follows: "The election of all officers shall be by ballot. Nominations for all officers elected by the student body, including managers of student activities and editors and managers of student publications, shall be posted on the bulletin board one week before election, in the form of a petition signed by ten students of the university."

2. Article I, section 15, "The student activities fee, collected at registration, shall be apportioned among the various student body activities by the student council."

3. Article I, section 15, "There shall be an auditing committee appointed at the beginning of each school year, composed of a chairman, who shall be a member of the faculty appointed by the president of the university, and two students chosen by the student council. This committee shall supervise the methods of accounting of all managers of student body activities and shall audit the books of said managers and publish a report thereon at the end of each quarter."

4. Article I, section 17, "There shall be an athletic council, composed of three students elected by the student body, the coach, and one other member of the faculty, the last two named to act in an advisory capacity with no vote. This athletic council shall supervise all athletic activities and all financial affairs connected with said activities."

DON RICHARDSON,
President.

RETURNED SOLDIERS MAY SECURE CREDIT

Basis Upon Which It Will Be Given Practically Same As At California and Illinois Universities.

Credit toward graduation from U. N. M. will be given to returned soldiers and sailors upon practically the basis as it is given at the University of California, and the University of Illinois, according to recent decision of the faculty.

The basis upon which credit will be given is as follows:

For military service as a private or officer.

Three months or more, 8 hours.

Two and three months, 4 hours.

Officers' training camp or technical training camp.

One hour credit for each week in camp, a maximum of 1 hours being allowed.

By this plan it is possible for some students to obtain at most 16 hours credit. This credit will be given, however, only upon recommendation of the R. O. T. C. commanding officer and of the committee on student standing. A student must make application before any credit is granted.

Another provision is that the student must have been registered at this university or some other college of the same standing previous to entering the service, and must be in good standing in the school.

Removal of Conditions.

Monday, June 9, has been set by the faculty as the last day for removing conditions or incompletes, incurred during the winter quarter. Any condition or incomplete not removed on that day, automatically becomes a failure. A fee of \$2 is now required for taking these examinations.

SWIMMING POOL REGULATIONS.

A new regulation as the hours which must be observed by those using the swimming pool has been posted. It was thought necessary by some to establish a rule that the men and women should not use the swimming pool at the same time so the following schedule has been announced:

Forenoons, afternoons from 5:00 to 6:00, Tuesday, Thursday and Saturday nights for the men. Afternoons till 5:00, Monday, Wednesday, Friday and Sunday nights for the women.

This regulation is causing quite a bit of controversy and will probably be changed for one not quite so rigid.

DR. BOYD RESIGNS.

In the resignation of Dr. Boyd as president of the University, the school has lost one of its best friends, a man who has worked unceasingly for the betterment of the school and has done a great deal to bring the institution to the place it occupies today.

During the seven years that Dr. Boyd has held the office, he has changed the University from a prep school to a standard university, recognized as such throughout the country. He has increased the enrollment many times over that which was had before 1912. Throughout his presidency he has worked, not for the present alone, but toward the future. He has helped to lay the foundation upon which some day a large and powerful structure will rise, and in that day people will look back and remember him as one who labored toward an end he could not hope to live to see, but which would come in time, and the sooner because of his efforts.

Not only has he accomplished much but he has been admired and respected by all with whom he has come in contact. He has made many friends, and all who know him are better men or women by having been associated with a man having such high ideals and sterling character.

Dr. Boyd has had many difficulties to overcome, and it sometimes seemed that the odds were continually against him. But he has shown himself to be master of situations which others would have been glad to leave alone, and the results of his work speak for themselves.

The best wishes of faculty and students follow Dr. Boyd wherever he may go.

WELL TO WORK AGAIN.

After having tapped the city main, installed temporary pumping apparatus and pumping day and night to supply the university needs, it has finally been decided to install the motor for the deep well and use the hole in the ground for what it was intended. The motor will be set 200 feet below the ground and will require careful attention to be kept in order, but little things like that can be overlooked if an ample supply of water is assured.

LET THERE BE LIGHT.

A stranger coming up past the University on a dark night could pass by and go back again without as much as suspecting that anything more than a few residences were scattered about. He would be astonished

to learn that he was passing the campus of the State University. And he couldn't be blamed, for to our knowledge there is just one light on the whole campus, and that is there only when the globe isn't broken.

Electricity is high, we must admit. But is it so expensive that we can't afford enough lights scattered over the campus to at least make it look habitable? Does it cost so much that we can't afford to prevent strangers, and home folks too, from remarking upon the darkness surrounding a co-educational school? For it is noticeable, strikingly so, and attracts comment. And the comment is not complimentary.

After a gathering in Rodey Hall, unless the night happens to be moon light, the crowd stumbles blindly out and gropes its way to the car line, meeting with more or less success the trees, flower beds and other obstructions scattered about.

The University has a unique and enviable location. Much work has been done putting in grass, flowers, etc., to make the grounds attractive. That is all right. But must we forget that some one-third of the twenty-four hours are not conducive to seeing these things without artificial illumination?

A nice little advertisement would be a large reflected light on top of the main building that could be seen twenty-five miles or more in all directions. Before that, though, a dozen or two light on the ground—enough to enable a person to find his way around without risking life and limb—and reputation.

When we come back next fall, we will be looking for more outside illumination.

COMMUNICATION.

The writer of the editorial in last week's issue of the U. N. M. Weekly, in speaking of cuts said that there seemed to be no noticeable penalty for an excessive number of cuts. He is evidently one of those who has attended his classes rather regularly so that the penalty for absences has not come to his notice. According to the regulations on page 48 of the catalogue, which are strictly enforced, each absence in excess of the number of credits normally earned in a course, is penalized by the deduction of one-tenth hour credit. It may be that this penalty is not heavy enough, and if general opinion is favorable an increase in the penalty could easily be arranged. The faculty feels that this deduction in credits is right in principle.

In regard to the issuance of permits to make up lost work it might be said that such permits are issued only in the case of absences which seem necessary, and mostly in the case of absences caused by illness.

Of course, it is very difficult to check such causes for absence, as the dean is not a physician and it is impractical to require a physician's certificate in each case, at the present time. Such a plan is contemplated. Suggestions for bettering this system will be gladly received.

The faculty appreciates very highly such constructive criticism tending toward raising the standards of scholarship in the institution as that expressed in the editorial mentioned. The principle of reward for a high class of work is followed in the system, limited, as far as I know, to New Mexico, of allowing more credit toward graduation for S and G work than for work of an inferior grade.

SOCIETY

HARRIS-RODERS WEDDING.

The marriage of Estelle Harris to Guy Rodgers came as a great surprise to their many friends. They were married on Monday night at Beien, and left on Wednesday night for N. Y., where they will spend their honeymoon. Estelle Harris has attended the university two years and during that time has made quite a name for herself in musical circles, as she possesses a soprano voice of great promise. She was a member of the Kappa Kappa Gamma Fraternity and a very attractive and popular girl. The varsity extends best wishes and congratulations.

Joy Spruce is back again with us after a illness of several weeks.

PHI MU OPEN HOUSE.

Phi Mu was hostess to University students and friends, Sunday afternoon. Mrs. Lackay gave a delightful solo, and Miss Grace Stortz sang several selections from "The Kid's Clever." Coffee, sandwiches and cake were served during the afternoon. The hostesses were Misses Marian Spicer and Ruth Tompkins.

Among the university students who attended the high school dance Friday night were Misses Dorothy Stevenson, Beatrix Black, Floria Marshall, Margaret Lee, Marian Spicer, Katherine Angle and numerous U. N. M. boys.

An enjoyable automobile party and half picnic took place on the mesa, Sunday night. Two carloads of students met each other about six miles out on the Tijeras road and divided up their so-called lunches.

PERSONALS.

Mrs. C. Roy Jacard, formerly Miss Ruth Bright, a member of the Phi Mu fraternity, is a visitor in town.

The Phi Mu fraternity intends to give a house party, at the Bishop's Lodge, near Santa Fe, the last two weeks of June. About twenty girls will enjoy the pleasure of Miss Katherine Chavez's hospitality.

Miss Betty Arnot, Rebekah Shipwith, Anne Cristy, and Julie Doran, will attend the national convention of the Phi Mu fraternity to be held in Cleveland, Ohio, about the middle of July.

Word received on the campus from Clair Fetzer, a last years student, states that he will arrive in Albuquerque this week. Fetzer has just returned from overseas service in the engineering corps.

LOCALS.

Leslie Boldt and George White have been visitors on the hill this week. Both have just been discharged from the naval aviation service, after spending eight months at Killingholme, England, and six months in New York. Boldt plans to enter school next fall. They are members of the local chapter of Pi Kappa Alpha.

Prof. J. S. Landers, of the department of Psychology has been absent from the university delivering commencement addresses at Portales and Tucumcari. He returned the early part of this week.

R. O. P.'s AND VARSITY
PLAY THIRD GAME

At 6 p.m. Tuesday evening the university and the R. O. P.'s cross bats on the university athletic field in their third game of base ball to decide which nine will be victorious over the other this year, each team having won one game.

The first game played between the two teams on April 22 was won by the varsity with a score of 10-5 and the second game played on May 15 was won by the R. O. P.'s with 13 points to their opponents 6.

Both teams are out in earnest for the prize and a good hard fought game is sure to be the result.

BASEBALL SEASON
TO CLOSE FRIDAY

Varsity To Meet Indian School Memorial Day For Decisive Game of Series.

Memorial day will probably close the base ball season. At 10 o'clock that day, the university and the Albuquerque Indian school battle out their decisive game on the university athletic grounds.

The two teams have each won a game and much interest and enthusiasm will be manifested. The spectators will probably out number any previous attendance this year.

On the varsity side of the game everyone is expecting to root for their team until victory stares us in the face. The Indian school has always had a good attendance and she will probably reinforce for the day's engagement. At any rate the game will be a good one and you will testify to the fact after we witness the combat.

The probable lineup will be:
University: Steed, F. (5); Culpepper (1); Moore, C. (7); Gentry (6); teed, H. (2); Moore, H. (4); Mooris, C. (8); Thomas (3).

A. I. S.: McCabe (3); Martin, E. (4); Martin, G. (6); Haswood (5); Noble (9); Burnside (8); Dentele (7); Tonnely (2); Ayze (1).

R. O. T. C. UNIT IS ADVANTAGE TO CITY

**Captain Purviance In An Address
To Kiwanis Club Thursday Tells
How R. O. T. C. Will Benefit City.**

Advantages of the establishment of an R. O. T. C. unit at the University of New Mexico were outlined by Capt. C. E. Purviance, U. S. Army, professor of military science and tactics at the university, in an address before the Kiwanis luncheon Thursday noon.

The government would put in a mixture of an extension to the engineering school and a department of military science. Everything would be furnished free. The university has only to furnish housing for the men and now has the facilities, provided they are fixed up.

The property installed would probably represent an outlay in money of \$30,000 within two years, based on the value of the equipment and personnel allotted to the university. The items furnished free to an infantry unit of 100 men are clothing, ammunition, ordnance equipment, quarter master's stores, maps and text books. For cavalry unit of 37 men per unit, the government would furnish horses, forage, maintenance but not the entire stable detail. For a motor transport unit with a minimum of 50 men, the government would furnish six trucks—two two-ton Rikers, two intermediate trucks and two light ones. In addition, it would give instruction in maintenance and supply gas and oil. A testing plant of one pit would be furnished by the university. The motor transport unit would have to be installed in connection with another unit, preferably cavalry.

During the summer, the students taking the motor transport work would go to an instruction center, which would be a plant similar to the Baldwin Locomotive works, but under government control. The one for this territory would doubtless be located at San Antonio, Tex.

There would be several results from the establishment of such a unit at the university. With the approval of the local rifle club, the rifle range would eventually be expanded to six butts instead of two. The local armory would likely be fixed up into a club for the shooting fraternity and contests could frequently be held there. Shooting clubs be formed in the high school, university and Y. M. C. A. Other towns could send teams here for contests and a state team could be sent to an eastern shoot at the expense of the government.

These advantages would also mean a boom in railroad business, in drayage and hardware sales. If the university grows as it should, it would mean the employment of architects and an increase in real

estate business. Fraternities and sororities should build at the rate of one new home every five years. This does not include the gradual expansion of the university plant proper.

The course would cover four years, but only the first two would be required. The student would be required to attend one camp at the Presidio for forty-two days, for which mileage and subsistence would be furnished by the government.

During the last two years, the students permitted to take the work would receive forty cents a day commutation quarters and will be required to attend one camp during the two years. The local high school is now assured a corps and students from there could at once enter for the advanced training. Previous service men could also take the higher work. Men finishing the four-year course would be listed by the war department for use in national emergencies.

After two years, it is possible that the government would add special units, such as field artillery machine gun, signal corps, and the like. The present authorities desire to see the establishment first of infantry and motor transport units.

WEATHER REPORT.

For week ending May 26, 1919, university station.

Highest temperature, on 21st, 80 degrees; mean highest, 75 degrees.

Lowest temperature, on 24th, 42 degrees; mean highest, 50 degrees.

Lowest humidity, on 21st, 25 degrees; mean humidity, 61 degrees.

Maximum wind velocity, on 20th, 45 miles; mean maximum, 29 miles per hour.

Precipitation on 20th, 22nd, 23rd, 25th and 26th, in all, 1.22 inches.

Three days clear; two partly cloudy; two cloudy.

DR. BOYD RESIGNS.

(Continued from page 1.)

has proven highly efficient in making the limited funds of the institution cover the requirements not only of maintenance and operation but of an important construction and improvement program. All of the building done since New Mexico became a state, has been done under his supervision and his most recent work has been the improvement of the grounds which has added one hundred per cent to the attractiveness of the university and to the value of its property.

The University of New Mexico, like all other educational institutions, suffered severely as a result of war demands on students. The student army training corps unit here, as elsewhere, was no more than established when the end of the war brought on its withdrawal. Both establishment and withdrawal

caused confusion and disorganization. (Incidentally the expense of the unit's establishment was heavy.) Mr. Brooks, by careful management, was able to meet all of the extraordinary expense attached and to return to the institution every dollar expended on account of the student army training corps.

It was one of Mr. Brooks' main objectives to increase values of the 30,000 acres of land owned by the university on the mesa east and south of Albuquerque. The extensive water supply development which he carried out on the university campus was aimed not only to provide an immediate water supply, but also to test the availability of a permanent water supply for irrigation on the large tract. Experts agree that this demonstration has been accomplished and that the availability of the greater part of the 30,000 acres for orchard and home development has been proven. While carrying out this work Mr. Brooks was able to connect the various parcels of land surrounding the campus of ten years ago, into a solid tract of 400 acres, directly adjacent to the buildings, and constituting one of the largest university campuses in the United States.
