UNIVERSITY OPENS WITH FINE PROSPECTS

Large Enrollment on First Day Presages Excellent Year in All Lines For Varsity.

The twenty-third opening of the University which took place Monday, August 17th, marks another step in the onward progress of the Institution, and the manner in which the students showed up and are still coming in, was a source of gratification to all the University authorities.

Old Ones Returning.

The number of old ones returning was especially pleasing, and with them back, and the new students taking the place of those failing to return, or lost by graduation, it is felt that by the end of the present week the number enrolled will show a healthy increase over the total for all last year.

Athletic Prospects.

One noticeable thing to be observed on the campus the last few days was the number of husky looking young fellows strolling about. Coach Hutchinson is already laying plans for a championship football team for this season, and if looks count for anything, the University ought to be coming into its own this year for fair.

Faculty on Hand.

All the faculty, with the exception of E. S. Seder, in charge of the Department of Music, were present last Saturday, at which time the first meeting was held, and plans laid for the courses of study, etc., during the coming year. The Committee on Schedule has about everything arranged, and in its next issue, The Weekly will give the schedule for the benefit of those interested.

First Assembly Thursday.

The first assembly of the year will take place tomorrow (Thursday) morning at 10:00 o'clock. All students are urged to be present on this occasion and participate in the exercises. Friends of the University are always cordially invited and welcomed on these occasions, the object of which is to present topics of interest and instruction to the students, faculty and friends of the University.

CHANGES IN RHODES SCHOLARSHIP REGULATIONS

The following letter received by Dr. Boyd from Dr. Geo. R. Parkin, Secretary of the Rhodes Scholarship Trust, contains some valuable information for those who contemplate taking the Rhodes examination.

Seymour House,
Waterloo Place, S. W.,
20th June, 1914.

Dear President Boyd:—

You will see from the revised Memorandum, which is being forwarded to you under separate cover by this post, that the Trustees have decided to make a considerable change in the system of electing Rhodes Scholars in the United States. It is expected that by spreading the election of scholars over three years the men may be more easily placed in the Colleges of their preference at Oxford.

I regret that in making this change it has been necessary to exclude your State from the election for 1916, as the re-arrangement has been based on

PRESIDENT BOYD RECEIVES PRAISE

Stand on Dancing Commended by Local Daily—Prexy a Model President.

It is not often that a daily newspaper will go so far out of its beaten track as to print a half column in praise of any one man, yet a recent issue of the Albuquerque Morning Journal contained the following, apropos of a lecture recently delivered in Santa Fe by Dr. Boyd, president of the University:

"The thing we like best about Dr. Boyd is that he is a high-brow who has not lost his perspective or his sense of humor. The type of high-brow, and especially the type of university professor highbrow with which we most frequently come in contact is a solemn ass, about as cheerful as a funeral procession and as entertaining as the reverse side of a whitewashed fence, whose vision extends no further than the books that he read and the four walls in which he leads his cloistered life.

"Dr. Boyd isn't that sort. He feels as well as thinks. He is human, and his greatest delight is in the study of his fellow-man.

"Perhaps, though, the day will yet come when for college presidents, we will look for human beings, like Dr. Boyd, instead of mummies."

the amount of competition in past years. You will note, however, that candidates who pass the qualifying examination in October, 1915, will be eligible, providing they fulfil the other conditions, for appointment in 1917, when a scholar will be again elected from your state.

While this change in the regulations may cause temporary disappointment to a few students who are looking forward to compete for the scholarship in 1916, the Trustees have felt bound to overlook this in view of the permanent administrative advantages arising from the alteration. After next year the new routine of election will proceed in the ordinary way for all the States.

I think that I should also point out to you a further change in the regulations indicated by the Memorandum. Hitherto, in making application for the scholarship, competitors have been required to choose between the State in which they have their regular domicile, and the State in which they have received a large part of their education, and they were not allowed to compete in any other State than that originally chosen. This restriction is now removed and a man may, should he wish, compete in alternate years in the State in which he has his domicile and the one where he has received his education. It is hoped that this change may increase competition in States which have hitherto furnished very few candidates.

The Memorandum is being sent to all the institutions of your State of which I have knowledge, but I shall feel greatly obliged to you if you will do anything you can to make the changes in the regulations known as widely as possible.

Believe me,

Yours sincerely,

GEO. R. PARKIN.

LACKEY-M'FIE UNION INTENSE SURPRISE

Kept a Secret for Seven Months. Other University Weddings.

The announcement, during the mid-summer vacation, of the marriage of Miss Mary McFie to Lawrence B. Lackey, came as an intense surprise to their many friends, both at the University and elsewhere. The wedding occurred at Belen on January 3, and was kept a secret until announced last July by Judge John R. McFie, of Santa Fe, father of the bride.

As news, the Lackey-McFie wedding is no longer of any value—everybody knows about it. But it remains to those of us who knew them here at the University to express, as best we can, our regret at losing them from the hill, and to give them a hearty God-speed on their journey.

Mary McFie and Laurence Lackey were undoubtedly two of the most popular people the University ever had. Miss McFie, by virtue of her musical talent and her charming personality, has won state-wide recognition. No social gathering was complete without her presence, and no musical entertainment, either student or otherwise, assured of success without her participation.

And Lackey, the athlete, has a reputation which is by no means confined to the University or to Albuquerque. He has earned his letter in baseball, football and track, and wherever a University team has gone since Lackey has been in school, the name of Lackey has gone before it. On the campus, his ready good humor has always asserted itself, no matter how trying the situation.

With the loss of Mr. and Mrs. Lackey, the University loses two of its best and most representative people, and the Weekly's congratulations are mingled with feelings of regret at the loss.

Wells-Bonnett.

Last Wednesday afternoon, at the residence of Rev. S. E. Allison, occurred the wedding of Prof. C. E. Bonnett, professor of economics and political science, and Miss Mamie Wells, formerly a teacher in the Albuquerque public schools. Professor Bonnett succeeded in keeping his matrimonial intentions a complete secret, and the wedding, with an uncanny adherence to University precedent, was in every sense a surprise to his many friends.

Prof. and Mrs. Bonnett spent the first few days of their honeymoon at the Trimble Wells ranch east of Albuquerque, and are now at home to their friends at their apartments in the Occidental building. The Weekly joins their many friends in extending congratulations.

Everitt-Ross.

Wm. Ross, '09, and Miss Evelyn Everitt, '13, were married on June 13 at the home of the bride's parents, Mr. and Mrs. Arthur Everitt, 818 North Third street. Both are well known and popular Albuquerque people. Mr. Ross holds the position of deputy county surveyor. They are at home to their friends at their residence on North Eleventh street.

Benedict-Otto.

Chester Otto, ex-'13, and Miss Lulu Benedict, a former Albuquerque high

EXCELLENT FACULTY FOR COMING YEAR

All Persons of Reputation in Their Respective Lines.—New Departments Added to Courses.

One of President Boyd's important tasks during the summer vacation was the selection of a suitable faculty for the Institution during the coming year. In Dr. Boyd's estimation, and in this he voices the opinions of leading educators throughout the country, it was essential to choose men who were not only excellent scholars and instructors in their respective subjects, but also to choose those who, by their character and personality would be an inspiration and guidance to the students with whom they come in contact, both in the class-room and otherwise.

Great Care Exercised.

As may be imagined, the selection of such persons proved by no means to be a small task, but during the summer months, President Boyd, with his indefatigable energy and perseverance, kept on the lookout, and by the opening of school, was ready to place at the service of the University a faculty of which any institution in the country would be pleased and proud to have as representing itself.

The first selected was Professor William B. Edington, an A. M. of the University of Chicago, and for the past two years, instructor in Mathematics at the University of Colorado. During his course at Chicago as a student, Professor Edington made an enviable reputation for himself, not only in Mathematics, but in other lines of intellectual activities well, and all his associates, instructors and pupils speak in the highest terms of him.

Home Economics Woman.

Miss Margaret Gleason, Director of the Department of Home Economics, and Matron of Hokona, "the abode of the blessed," is a graduate of the University of Chicago, and in addition has taken advanced work in the Universities of Columbia, Chicago and Iowa. Miss Gleason was chosen for these responsible positions by President Boyd after he had carefully considered a number of applicants for the places.

Modern Languages Man.

Professor Josef F. Nelson, Head of the Department of Modern Languages, comes to the University with a well-established reputation in this work. Professor Nelson speaks, in addition to French and German, his work in the University here, seven other modern languages, as well as having an intimate acquaintance with Latin and Greek. Professor Nelson has already ingratiated himself with his students and associates, and an excellent year in his line is predicted.

Psychology and Philosophy.

Professor Dean A. Worcester, formerly of Colorado University, and for

(Continued on page three)

school student, were married last week at the home of the groom in Los Angeles, where Mr. Otto is engaged in the electrical supply business. The couple will be in Albuquerque soon.

WEDNESDAY, AUGUST 19, 1914.

ATHLETICS.

With a good husky bunch of men already enrolled, and more coming in every day, prospects for one of the best years in athletics in the history of the U. N. M. are unusually bright. A number of the old men will report for football practice soon, and with these as a nucleus, a team will be built up which will make the Aggies and a few other would-be look like thirty cents by comparison.

In the past, the trouble with the University's athletic teams has not been in lack of practice, poor coaching, or absence of fighting spirit. These things have been so thoroughly in evidence as to be looked on as a matter of course. The weak spot has been in the scarcity of raw material with which to build up a team; and this year, it would seem that this defect has been most effectively remedied. The Varsity should score a walk-away.

Coach Hutchinson is already putting the gym equipment in shape, and the practice field will be cleared off at once for preliminary football work. We anticipate the pleasure of "writing up" an unbroken chain of victories.

FRESHMEN—NOTICE!

That life be less miserable for you, the Weekly publishes the following:

1. Always remember that you are merely Freshmen and as such respect and honor all Upper-classmen—humble yourselves before them.
2. Your prep. school fame is worthless. Mere mention of it offends the name of the University—therefore wear your prep. school emblems on the back.
3. Tobacco is not intended for babies. Smoking is forbidden on the campus until after Xmas vacation.
4. Since Freshmen are merely children it is entirely improper for you to use either derbies or canes during your entire freshman year.
5. You must learn the first and last stanzas of the "Alma Mater" before Sept. 15, 1914.
6. Never sit on the benches. They are reserved for Upper-classmen.

GYMNASIUM AND PHYSICAL CULTURE.

During the summer months the gymnasium, under the direction of Mr. Prickett and Coach Hutchinson, has been given a thorough overhauling and renovating in preparation for the beginning of school.

Sixty new lockers, for the use of both men and women, have been purchased and set up, as well as a quantity of apparatus and other

paraphernalia necessary to a thoroughly equipped and well conducted gymnasium.

Classes in Physical Culture for men and women will be started this week. All Sub-Freshmen and members of the Freshman and Sophomore classes, unless exempted by a Physician's certificate, will be required to take these courses, which will be held twice a week for both sexes.

The work will comprise drill in Indian clubs, dumb bells, etc., and efforts will be made to correct all defects in the pupils. Physical examinations will be held at the beginning of the courses, and at various intervals throughout the year, to note the progress made by the pupils, and advice will be given and exercise recommended to suit each individual case.

The University believes that to be an all-around and well-developed man or woman, the physical side, as well as the intellectual should be looked after, and consequently the courses in gymnasium have been included in its curriculum.

COMMENCEMENT NUMBER OF NEWS.

Living up to his reputation as a writer of interesting as well as scholarly attainments, Professor Charles E. Hodgkin, Dean of the University, in the Commencement Edition of The University News, issued a publication that at once commanded the favorable comment and attention of all who read its contents.

The issue was embellished by a number of photographs, of members of the graduating class, Bishop Howden, the speaker at the Baccalaureate Services, etc.

A full account of the commencement exercises, including the complete address of Rt. Rev. Frederick B. Howden, and Honorable Herbert W. Clark, the Commencement speaker, were contained in the paper, as well as announcements for the coming year, and other matter of interest.

The next issue of The News will be out shortly. The object of the paper is to promote an interest in the University and as a consequence the paper is sent gratis to all who desire it. New students at the University, as well as old ones, who desire The News sent to interested persons, are requested to hand in all such names to the President's office, and they will be placed on the permanent mailing list, and the paper sent them hereafter.

THE WHY OF THE WEEKLY.

It seems to be the custom for the Weekly to state, at the beginning of the year, what and why it is. This seems to be unnecessary, but, lest a precedent be broken, we will briefly summarize the following points:

The Weekly is, first of all, the official publication of the student body of the University of New Mexico; it intends to be as representative, and to voice the sentiments of the student body, as much as possible; it is non-partisan; and it will always work for the general betterment of the student body and of the University. On and for these things it is the aim of the Weekly to stand.

A day or two ago at the Commercial Club, occurred the meeting of the only woman lawyer and the only woman editor in the State of New Mexico Mrs. "Judge" Harold Pearce of Albuquerque has the distinction of being the only woman in the State who has been admitted to the bar, and Mrs. Josephine Foster of Las Cruces, editor of the Rio Grande Republic, the only woman editor in the State. This is of interest to U. N. M. students and alumni, in that Mrs. Pearce graduated from the Varsity in 1901 or '902, and has since taken an active interest in scholastic affairs.

Fred Forbes, ex '13, is superintendent of a cyanide plant in Nicaragua.

FOUND.

Lady's wrist bag containing the following: Powder bag, two matinee tickets, scissors, five samples of ginger, three skeins of silk, seven newspaper clippings, five receipts, smelling salts, three door keys, tooth brush, box of rouge, handkerchief, package of hairpins, roll of curl leads, pair of gloves, one street car ticket, forty-seven dry goods store ads, grocery list, memorandum book, autograph album, package of chewing gum, pair of smoked glasses, small oval looking glass, can of floor stain, nickel's worth of after-dinner mints, two slipper buckles, broken garter, three samples of lace, dress pattern, nineteen invitations to pupil's recitals, manicure set, curling iron, small pair of tweezers, package of toothache gum, one dozen picture postcards, five sample packages of breakfast food, gas bill, railroad time table, photograph of William Faversham, knob off chafing dish and 9 cents in real money.

Heartless.

Absorbed in her own sweet thoughts Miranda meandered through the meadow, coyly aware that in the distance her lover awaited her coming. The sun just popped off this earth as Miranda was clasped in her lover's Sandow embrace. "It has been the longest day in the year," he whispered ardently as he held her still closer. How perfectly sweet of him, thought Miranda, as she closed her eyes in an ecstasy of happiness. "Sweetheart," she breathed, raising her face to his, "why has it been so long?" "Because—because," he answered demely—"well, because, my dear girl, it's the twenty-first of June."

Nature's Foresight.

An ordinary woman's waist is 30 inches around. An ordinary man's waist is 30 inches long. How admirable are thy works, O Nature!—Ex.

NEW STUDENTS' RECEPTION POSTPONED.

At a meeting of the student body Wednesday morning, it was decided to postpone the new students' reception until about September first, as a large number of old students have not as yet returned to Albuquerque. A large number of the men hold positions which they will be unable to leave before the first of the month, and as the purpose of the reception is to give the new people a chance to get acquainted with older ones, it was decided to hold some sort of informal affair at Hokoma in a few days, and the formal reception later on.

HEALD HAS NARROW ESCAPE.

The July issue of the National Geographic Magazine contains an interesting account of a narrow escape from death which Kenneth Heald, ex '11, recently had while in Peru with the Yale Geographic Survey. The party had scaled a high cliff, at the top of which lay an ancient buried city. Heald was standing near the edge of the cliff, when a false step caused him to lose his balance, and he fell downward into the chasm. He managed to grasp some shrubbery about ten or twelve feet from the top, and hung suspended until the rest of the party could procure a rope. The strain proved too great for his shoulders, which were laced with silver wire as a result of his football days, and he was forced to spend the succeeding few months in a hospital. Heald is the second U. N. M. student to hold a position with the Geological Survey, the first being Kirk Bryan. Bryan has recently been working in Arizona and Wyoming under Gregory, of Yale.

EXCELLENT FACULTY FOR COMING YEAR (Continued from page one)

the last several years in charge of Public School Education in the Philippine Islands, will need no introduction to friends and students of education. Sufficient to say that his recommendations from all with whom he has labored and worked are of the type that make him a valuable addition to any university or college faculty.

Department of History.

The work of history which is coming to be more and more recognized as one of the important adjuncts of a true University, has for this year been put on a firm foundation and will be one of the strongest features of the University for the future. It is in charge of Professor Proctor F. Sherwin, a graduate of St. Lawrence University, New York, and an A. M. from the University of Chicago. Professor Sherwin's credentials speak for themselves, and from the manner in which he has already taken hold of things, and started his work, the continued success of this department is assured.

Civil Engineering.

Recognizing the value of Engineering in its different phase to the people of New Mexico and the Southwest, President Boyd has striven, during his two years here, to add strength and value to this Department. As a consequence the Department of Civil Engineering has been put in charge of Professor A. W. Wand, of Illinois, a graduate of the University of Illinois, and in addition to his scholastic attainments, has had several years' practical experience in Engineering in one of the largest concerns in Chicago, and comes to the University of New Mexico heartily recommended both by his University and his employees.

Shop Work.

The shop work has assumed such proportions that a separate man has had to be put in charge of it, to devote his exclusive time to it. Professor Arno K. Leopold, one of last year's graduates from the Department of Science, and who has assisted in shop work for the last two years,

during his years here as a student, has been given charge of this responsible work. Professor Leopold's success during his student days, with this Department is a safe assurance of the continued growth and value of this Department under his espousage as a member of the University's faculty.

Department of Music.

Mr. E. Stanley Seder has been appointed to have charge of the Department of Music, taking the place of Miss Mary McFie, resigned on account of marriage. Mr. Seder has during the past summer been in New York, studying under the direction of Mr. Mark Andrews, one of the leading organist and vocal instructors of the country, and under Mr. Seder's direction it is confidently felt that the splendid success already attained by the Department of Music under Miss McFie's direction will not only be continued, but if possible, improved upon and extended.

LOCALS and EXCHANGES

LOCAL.

Next!

First and foremost, allow us to introduce to you the U. N. M. Weekly. It is the "official publication of the student body of the University of New Mexico," and as such it is dependent to a certain extent on you, as a member of that student body, for its being. It wants you, in the first place, as a subscriber; in the second place as a contributor—to add any bit of news of which you may have knowledge; and thirdly, be behind us in spirit. Don't knock. These things on your part will render a good paper a certainty.

What an ex-U. N. M. student thinks about it: "From the epidemic of love that seems to be hovering around Albuquerque, I recommend that all boys over the age of fifteen be kept off the streets, and at home in the evenings unless they have been thoroughly fumigated. I really am quite alarmed for Ira's kid brother."

Why not another tennis court or two on the campus?

The engagement of Miss Eileen McMillen to Laurence F. Lee was announced during the summer. Mr. Lee is a former University student.

Lucie Belle Alexander will teach this winter at Clovis.

Abuse the editor any time you feel like it. He likes it. But be sure you read the offensive article in your own paper, not one you borrowed from your room-mate. The price is one dollar, payable to the manager, G. L. Butler.

G. Robert Claiborne has imported a brother from Indiana who promises to be a material addition to the basketball and track squads. Besides having a creditable record in basketball, he holds the Southern championship in the two and three mile runs, as well as records in the broad jump and two-twenty.

Prof. Kirk says this marriage-bug is not a product of the altitude, but has its habitat in the drinking water. Secretary Bryan's grape-juice plan seems to be the only solution.

Come through with that subscription.

The Journal wonders whether Loving is a town or a state of mind. Well, Loving isn't on the map.

David R. Lane, a former University student and editor of the Weekly, was elected secretary of the State Good Roads Association in Santa Fe, August 1.

Doctor David C. Twitchell of Silver City will commence a line of original research work at the University soon. His experiments will be along the line of sun treatments for tuberculosis, a field which has been but little ex-

plored in the Southwest, and should his results be in proportion to those arrived at in similar tests in the East and in Switzerland, they will be of almost incalculable benefit to humanity. The University will publish a bulletin of his work when completed.

A 240-acre tract of land just east of the campus was purchased by the board of regents during the summer. No definite plans for its immediate development have been made.

Just before the close of the last school year, the Sigma Tau fraternity completed the purchase of the house which its members now occupy, thus being the first fraternity in New Mexico to possess its own residence property.

Miss Gertrude McGowen from Taos is a new resident of Hokona.

Fern Reeves of Las Cruces has returned, bringing with her her sister, Letha.

Miss Kathleen Long of Washington, D. C., has taken up her residence in Albuquerque and has already registered on the hill.

Carolyn Beals of Lake Valley and Mary Rebecca Graham of Monument are also new residents of Hokona.

Miss Jennie Boone of Capitan has also been enrolled.

The girls' dorm is all right but it will never seem the same, Gladys Irene Gwendolyn Peanz having taken up her headquarters down town. We all miss it.

Ruth McKowen has returned to the Varsity from Las Vegas, where she has been attending summer school.

Mary Cooper of Roswell and Adelaide Shields of Dawson are again in Hokona.

Mrs. Frazy has replaced Daddy Bell in the dining room, and Fern Reeves has succeeded Helen James at the toothpick counter.

The pie counter isn't going yet and the dining room has been very quiet.

Miss Margaret Gleason of Davenport, Iowa, is the new Dean of Women, and has already made many friends.

Mr. Albert Hunt should be given credit for the excellent condition of the tennis courts. Already many new students with athletic tendencies have enjoyed the fruits of his hard labor.

Miss Pauline Sewell, who has been attending school in the East, has returned to Albuquerque to accept a position in the Albuquerque public schools.

Chas. J. Andrews, formerly in charge of the University Glee Club, was director of music at the Archaeological Institute held the past few weeks at Santa Fe.
