*John H. Reagan High School, Austin, Texas; Architect: Page, Southerland & Page; General Contractor: Ricks Construction Company*

Finish and waterproof concrete surfaces at the same time with THOROSEAL PLASTER MIX, a cement-base coating that made dramatic savings in the construction of this new school. 8,000 square yards of concrete were completely waterproofed with THOROSEAL PLASTER MIX, applied by spray, floated, and then re-sprayed for a durable, uniform texture which was contrasted with rough "exposed aggregate" panels.

# STOP RUBBING CONCRETE!

*Job-tested, spray-on coating finishes and waterproofs new school with amazing speed and at ½ the cost!*
