ChemComp doesn't shrink from any job.

When you want minimized shrinkage cracking for absolute structural integrity, durability, and beauty, the concrete answer is ChemComp, Southwestern Portland's expansive cement. ChemComp is finished cement, not an additive or partial replacement. It greatly reduces maintenance and repair costs due to cracks. It generally eliminates the need for waterproof membranes or surface sealants. Check ChemComp's many advantages.

Griggs Exclusive
Push Back Chairs

Chairs Are For Sitting

Large people, little people, quiet people, squiggly people. Particular people. For assembly or auditorium seating to keep creatures of comfort happy, we ask you to sit down on the job and judge! Griggs Push Back Chairs are beautiful strong, comfortable and meant to welcome the contours of particular people.

Architects regularly use our design consultation services for:

Science labs / Offices / Artrooms / Dormitories /
Libraries / Auditorium seating / Home Economics
labs / Gymnasiums

UNCOMMONLY ATTRACTIVE ... and practical

EXPOSED AGGREGATE CONCRETE PANEL CONSTRUCTION

The Moriarty, N.M. Elementary School. Originally built in 1969, was recently enlarged to double capacity as the first phase of a master education plan for the city.

The building now contains sixteen classrooms, offices, library and learning resources rooms.

For an exterior treatment the architect chose local New Mexico stone aggregate for the precast concrete panels.

There were 86 such panels fabricated for the school by Hydro Conduit Corporation. Exposed aggregate concrete panels have given this building a maintenance free exterior and an attractiveness achieved with no other product.
