lightweight aggregate
concrete increased
usable area by 10% ●●

*Piel, Slater, Small & Spent
architect*

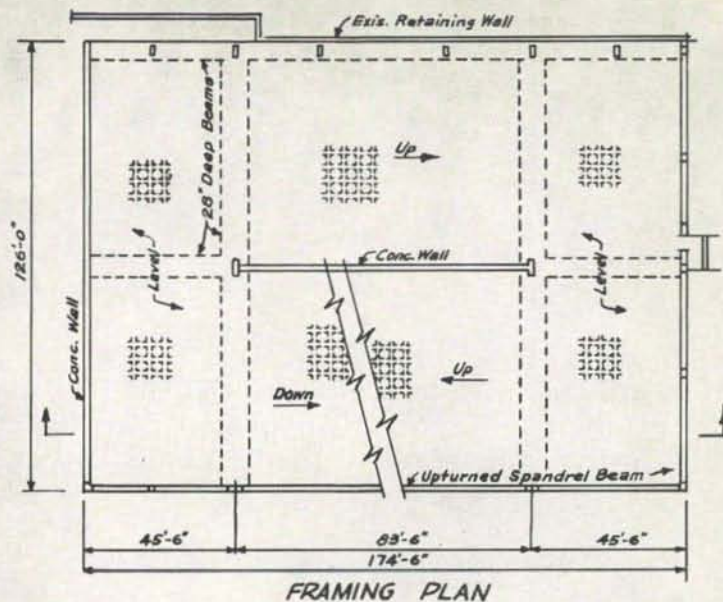

The continuous ramp parking garage for the Western Farm Bureau Life Insurance building in Denver utilizes 63-foot clear spans of post-tensioned Idealite lightweight concrete. The clear spans and the efficiency of the continuous ramp facilitate customer self-parking and provides space for 251 cars in 77,000 square feet. If you are considering the construction of a parking garage, warehouse, apartment, office building or other such structure, investigate the advantages of Idealite concrete. It's strong, yet light in weight; 30% less than normal concrete. It offers superior insulating and acoustical properties, as well as low moisture absorption and low shrinkage.

SPECIFY HYDRONICS*

FOR THE BUILDINGS YOU ARE PLANNING

- **FREEDOM OF DESIGN** Hydronics places no restriction on design or layout, provides specialized equipment to meet every problem.
- **FREEDOM OF MATERIAL** Hydronics is easy to install in any construction, whether it be curtain wall, precast, glass, or metal. Long spans and open layout present no heating or cooling problems.
- **PLEASED CLIENTS** Comfortable, heating and cooling will increase client appreciation of outstanding design. Assurance the client will get the performance that is specified.
- **PROVISION FOR FUTURE** With a hydronic system the mechanical equipment has the durability and long life that outstanding structures deserve.
- **ECONOMY PLUS** Through advance construction techniques, through low owning and operating cost, and because the client is protected against future changes in energy sources.

*** HYDRONICS — The science of heating and cooling with liquids.**
