lightweight aggregate
concrete increased
usable area by 10% ●●

*Piel, Slater, Small & Spenset
architect*

The continuous ramp parking garage for the Western Farm Bureau Life Insurance building in Denver utilizes 63-foot clear spans of post-tensioned Idealite lightweight concrete. The clear spans and the efficiency of the continuous ramp facilitate customer self-parking and provides space for 251 cars in 77,000 square feet. If you are considering the construction of a parking garage, warehouse, apartment, office building or other such structure, investigate the advantages of Idealite concrete. It's strong, yet light in weight; 30% less than normal concrete. It offers superior insulating and acoustical properties, as well as low moisture absorption and low shrinkage.

STANLEY® Automatic Sliding Entrances

Series 1000 AUTO-SLIDE: Complete with doors that swing open for emergency use.

Series 5000 SLIMLINE: Compact, narrow-line construction; especially suitable for small shops.

- Savings in floor space.
- Low initial and low maintenance costs.
- No safety carpets needed.
- Two-way traffic through a single door.
- Positive one-way traffic possible using one operating carpet.
- Aesthetically clean. No guard rails or barrier ropes required.
- Sliding doors avoid wind or stack problems.
- Reduced costs of air-conditioning and heating.
- Sliding motion of door is safer. Can be operated manually.

This attractive home is built with 8 x 4 x 16 Atlas White Mission Masonry

Atlas Mission Masonry is well adapted to building in the Spanish architectural style so popular in the Southwest. Painting is not required; available in various shades.

Don't settle for a substitute . . . build with Atlas Mission Masonry.
