Considerations and Conclusions Concerning the Transferability of Indian Water Rights	<i>Jack D. Palma II</i>	91
Recent Developments in the Northwest Regarding Indian Water Rights	<i>Robert D. Dellwo</i>	101
<i>Res Judicata</i> : Will It Stop Instream Flows From Being the Wave of the Future?	<i>Harold A. Ranquist</i>	121
Evaluating Alternative Compensation and Recapture Techniques for Expanded Public Control of Land Use: A Comment	<i>Johan B. W. Schölvink</i>	153

## RECENT DEVELOPMENTS

In-stream Use Appropriation Application Precluded	<i>Joel Jasperse</i>	159
Deep Seabed Mineral Resources Act	<i>Cheryl Hein Johnston</i>	163
Fair Market Value of Oil and Gas Leases in Forced Pooling Area Established by Terms and Prices Paid in the Area	<i>Maureen McGuinness</i>	169
Site-Specific EIS Ordered but Injunctive Relief Denied in Nuclear Waste Storage Case	<i>Sandy Barnhart y Chavez</i>	173

## NOTES

Clearing the Muddied Waters	<i>Stephen K. Bowman</i>	179
Supreme Court Denies Extension of Federal Regulation of Natural Gas Producers	<i>Lee Peters</i>	187
Mineral and Surface Rights Under the Doctrine of Accretion	<i>M. H. Schwarz</i>	199

# THE UNIVERSITY OF NEW MEXICO SCHOOL OF LAW

## ACCREDITATION

The School has met the standards of the American Bar Association and of the Association of American Law Schools. It was approved by the American Bar Association on February 24, 1948. Membership in the Association of American Law Schools was granted in December, 1948. The School is fully accredited.

## AIMS AND METHODS

The lawyer who functions in his profession, whether as private practitioner or as public servant, is an integral part of the system by which a democratic society governs itself. If he is properly to discharge the responsibilities of this role, his education for the profession must be both broad and intensive. In its breadth it must encompass a full understanding of and belief in the democratic respect for the individual personality and the democratic processes designed to allow the individual to develop and participate in a free, self-governing society. In its intensification it must impart a high degree of competence in the craftsmanship of the law—in those skills and insights essential to an adequate performance of the lawyer's function as advocate, judge, legislator, teacher, administrator, or civic leader.

Such education neither begins nor ends in the law school, and the School of Law is continually concerned not only with its own curriculum but also with the quality of pre-legal education and with the continuing self-education which should be pursued by all members of the profession. In consequence, it is urged that students enter the School with as broad a cultural and educational background as it is possible for them to obtain. Accordingly, the basic requirement for admission is now a baccalaureate degree from an approved college or university.

The student will spend the equivalent of six semesters of study in the law school in courses designed both to bring the teachings of history, philosophy, and the social sciences to bear upon the solution of legal problems and to develop the skills and insights essential to research, analysis, synthesis, criticism, and exposition. Due to the low ratio of students to teachers (less than 15 to 1), substantially more individual and small group work is possible in the School than in most law schools.

For application materials and further information, write to the School of Law, The University of New Mexico, Albuquerque, New Mexico 87131.

## BOOK REVIEWS

Natural Resources Commodities—A Century of Statistics		
Robert S. Manthy	<i>Nathaniel Wollman</i>	204
